

# How to make Network Configuration with FoxCloud 2.0

—Only three steps for enduser—

## Step1

Click the three points in the top right corner of the login page and select "WLAN Configuration".

## Step2

Keep Bluetooth on and wait for device searching.

Then choose the device and click "Connecting Network"

If you can't find the device, go to [step4](#)

## Step3

Choose SSID of home router and enter password, then click "Next".

Wait for 5-10s, it will complete the configuration.

If you can't find the device in step 2, please follow as below

## Step4

Choose "Input Manually" on the top right corner and scan the SN code

## Step5

Go back to setting of your phone to connect the device's network.

## Step6

Go back to APP2.0, and Choose SSID of home router and enter password, then click "Next".

Wait for 5-10s, it will complete the configuration.
